NUTRA

TAKGENE was established as a science-based company to produce different kinds of probiotic products. Newly this company offers a line of probiotic dermo-cosmetic products that benefits from a unique scientific approach to prevent and help treat different skin disorders and the healthy of the skin. The philosophy of the Nutra brand is based on the use of probiotic complexes specific to products to improve skin and hair health. These products are built on the power of probiotics and postbiotics to promote healthy skin.

Unique Benefits of the Probiotics Complex in Nutra Products

- Stimulation of keratinocytes to produce antimicrobial peptides
- Enhancement of skin barrier by increasing the expression of specific proteins in the stratum corneum and granular layer
- Probiotic bacteria, occupying keratinocyte receptors, reduce the skin colonization of pathogens and prevent bacterial infections
